## PROJECTS

|                                                                                                                                                                                                                                                                                       |          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>StudyGroup: Full Stack Collaborative Learning Platform</b><br>– Built a full-stack platform for student collaboration and resource sharing using React.js, Node.js, and PostgreSQL.<br>– Implemented authentication, group management, and responsive user interfaces.             | May 2026 |
| <b>TaskFlow: Smart Task Management Web Application</b><br>– Developed a responsive task management web application using HTML, CSS, and JavaScript during Thiranex Internship.<br>– Implemented task creation, tracking, and interactive UI components with clean responsive layouts. | May 2026 |
| <b>BlogsHere: Blogging Platform Frontend Application</b><br>– Designed a responsive blogging platform frontend using HTML5, CSS3, and JavaScript.<br>– Created reusable sections and mobile-friendly layouts for improved user experience.                                            | May 2026 |
| <b>ThiraMart: E-Commerce Frontend Web Application</b><br>– Developed a responsive e-commerce frontend application using HTML5, CSS3, and JavaScript.<br>– Built product pages, navigation components, and interactive user interface elements.                                        | May 2026 |
| <b>ClearLane Assist: AI Traffic Monitoring System</b><br>– Developed an AI-powered traffic monitoring system using TinyML and ESP32-CAM.<br>– Performed real-time lane detection and congestion analysis using image processing.                                                      | 2025     |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|
| <b>Full Stack Development Intern – Thiranex</b><br><i>Full Stack Development Internship</i>                                                                                                                                                                                                                                                                                                                                                  | May 2026 – Jun 2026<br>Hyderabad |
| – Worked on full-stack web applications using React.js, Node.js, and PostgreSQL during internship projects.<br>– Developed responsive frontend interfaces and integrated reusable UI components for modern web applications.<br>– Built and contributed to projects including <b>StudyGroup</b> , <b>TaskFlow</b> , and <b>BlogsHere</b> .<br>– Used GitHub and Vercel for project deployment, collaboration, and version control workflows. |                                  |

## ACHIEVEMENTS

- Published patent titled “*DRIVING SIMULATION SYSTEM*” (Application No: 202641035017 A) published on 03/04/2026 under Vardhaman College of Engineering.

## TECHNICAL SKILLS

- Programming Languages:** C, Java, JavaScript
- Frontend Technologies:** HTML5, CSS3, React.js
- Backend Technologies:** Node.js
- Databases:** PostgreSQL
- Repositories:** GitHub
- Deployment:** GitHub, Vercel (Basic)

## CERTIFICATIONS

|                                                                                                                           |      |
